ASSOCIATED PRESS TELEGRAMS.

HAVAS AGENCY

London, 6th.

It is stated that the British Government have completely abandoned the idea of sending a strong "corps d'armee" to the Soudan to help General Gordon

Paris, 6th.

The negotiations between the Powers for a Conference about the Liquidation Law in Egypt are going on very slowly, but there is yet hope of a general arrangement being arrived at. Egypt's refusal to join the Conference causes the delay.

New York 7th.

The Republican Convention at Chicago has nominated Senator Blaine, ex-Minister of Foreign Affairs, as candidate for the Presidency of the United States.

PRESS TELEGRAMS

Montevideo, 7th,

Stormy debate in the Chambers about the increase in Contribucion Directa.

The London and R. P. Bank accepted an order of Government to meet any pecuniary obligation of the Government until the Banco Uruguay is installed.

Said that Government will offer Ferrari 15,000 pats. for two performances, by his company in Solis on August 24th and 25th.

President Santos's grandmother is dying. She is a Portuguese lady, 114 years old.

Rosario, 7th,

It is generally said that the men who attacked Dr. Rueda were hired assassins.

A general resignation of the school teachers is expected, as they have not been paid for nineteen months.

The floating market in port will be inaugurated to-morrow.

DEPARTURE OF MR. CALLAN M.P.

Yesterday afternoon Mr Callan left in the Montevidean steamer, to catch the Britannia; and in wishing him a pleasant homeward voyage we express a hope that his mission to this country may be as productive of results, as was anticipated on his leaving London last year for the Plate. Mr. Callan, as member of Parliament, visited the country in a representative character; he has seen more of the Republic during his short stay than many of his countrymen who have passed a whole life time here, and we are well pleased to say, that, spite of the great hardship which he endured in Santa Fe, and the sad accident which confined him so long to his bed, he takes with him the most favorable impressions of the country, its people, our public men, our institutions and our industries.

Yesterday morning he had a long interview with President Roca who presented him with some maps of the Limay and Rio Negro districts, and invited him to use his great influence to obtain British emigration for those parts. H.E. has promised Mr Callan a grant of 32 square leagues down there in fee simple, conditioned on his putting 200 British colonists on same within 4 years; and we are pleased to say Mr. Callan has accepted the President's offer, and the papers were drawn up yesterday to conclude the concession Mr. Hansen, Under Secretary of Hacienda, who was present at the interview kindly taking charge of the matter to have it despatched to Mr. Callan's satisfaction. Our worthy countryman, therefore, leaves for Europe with the fee simple titles to 32 square leagues of some of the richest and most fertile lands in the whole Republic; and knowing as we do the country of the Rio Negro, we have the very fullest confidence in the success of the new Calla Colony to be formed on its banks.

On Friday Mr. Callan, in company with Mr. Deputy Murphy, visited La Plata and had a long interview with Governor D'Amico who was delighted to see him and welcomed him to La Plata. The Provincial Government has not however within its control any lands that could be apportioned for the specific objects proposed by Mr. Callan, as nearly all the public lands of the Province of Buenos Aires have been either rented or sold or set apart for new towns.

We shall look forward with deep interest to Mr. Callan's report on the Muricita lands in Santa Fe, and also to his views as to their adaptibility to our countrymen, opining as we do that for such lands Italians and Basques are preferable to English, Irish or Scotch. Mr. Callan's visit to the Plate will, however, be productive of one certain good to this country, as it will make us all better known in the House of Commons, where our visitor for so many years has so often distinguished himself. We shall henceforward regard him as the member for the River Plate in the House, and feel quite certain that the credit and honour and fair fame of the country will not be without a friend in the Commons so long as Philip Callan sits as member.

MENDOZA RAILWAY INAUGURATION.

VIII.

THE ANDES—THE ANDES—THE ANDES!

The city of Mendoza is about as far from the Andes as Buenos Ayres is from the Lomas de Zamora; but the intervening country between the city and the mountains is about the most desolate, stony country we ever drove through.

Mr. White, Chief of National Engineers, and Mr. Moreno, the renowned Argentine explorer, had arranged our party; and at 2 p.m. on Monday, 26th May, the coaches were drawn up at the Club House door. The party was, however, so large that it was impossible to get the members together. So we started with Messrs. White, Moreno and Tedin, in two coaches with three horses to each, leaving the ladies and others to follow us on the road.

Just as we emerged from the city we came on a sort of public-bath establishment, which we had no time to inspect, but we believe it is supplied with water from the mountains. From this spot to the very foot of the mountain there is really nothing to write about—stones and a miserable, lank, sapless brushwood was all that we could see around. We once drove through the Bog of Allen and thought it a dreary drive; but this drive to the Andes was infinitely worse. Here and there we came on gaps or ravines in the rocky mountain road which seemed partially filled up with congealed mud—a species of mud lava flowing down in torrents from those awful mountains in some terrible storm. Skirting the road, at intervals, we came on masonry which showed the great aqueduct which the Government has constructed to supply the city with water from the mountain. Mr. Tedin, who sat behind us in the coach, was astonished at the vast sterility of the scene; not even goats or asses could find subsistence in such miserable wilds; and yet people say that, owing to its proximity to the city, the country has some value, possibly for the sale of stones or mountain mud.

After an unmerciful jogging, we at last approached something green, some signs of vegetation; and here was a deep gore river with a rude country stone bridge; and here was a house, plots of alfalfa, horses, cows and goats. It relieved the soul to see standing at the gap of the mountain *a woman*. We followed the road, crossed the bridge, looked down into the beautiful tumbling stream, and—'dictu mirabile'—on the other side of the bridge we found a town. Yes, readers, in the very mountains we came on a collection of decent, good-looking country houses, with yards, gardens and corridors—but all deserted, all shut up.

Mr. Moreno told me, that in summer the well-to-do Mendoza families come out here for a few months and pass a very pleasant time. It is so close to the city that, whilst the families reside here, the young men come out from town on horseback in the evening, and the whole village forms one family, and dancing and music are kept up all night. Down in the glade are the hot springs which feed the river that we had just crossed, and I have no doubt that the families pass a pleasant time enough in this out-of-the-way spot during the hot months. In a storm it must be a truly awful place for ladies and their children, as the houses are exposed to the danger of being washed away by the swollen mountain torrents or buried under the flow of the mud lava, or blown to atoms by the tyrant Æolus from his grim, airy throne on the top of the eternally frowning mountains.

Here we descended from the coaches, and, as the ascent up the mountains was now very sharp, we proceeded on foot. We could see from the heights the other carriages from the city following, with Mr and Mrs Parish and Mrs Barker, Mr Fisher, Mr Galwey, Messrs. Robertson, Zapata, Alzaga and Graham; whilst the coaches with Miss Fisher, Miss Parish, and Miss Bidell, and Mr Livesey and Mr Woodbine Parish, now entered the village.

The way was narrow, rocky, and stony; but Mr Moreno knows every inch of these mountains. We proceeded for about a mile on foot, when we came on a lone cabin in the mountains, where a family lives and keeps a flock of goats. We spoke to the woman at the door of the 'rancho,' and she seemed surprised at my asking her if she was not afraid to live in this out-of-the-way place. Quite the contrary; she said they had nothing to fear, that there were no bad people thereabouts' and she lives as happy as the day is long with her husband and little children. We counted six, all in the bloom of health, decently clad, and fat and ruddy. The flock of goats maintained the family. We saw no signs of a garden or cultivation, and suspect that in the whole world there could not be found a more desolate or lonely spot to live, be happy, and rear a family. The young ladies of our party seemed much interested in this mountain home.

Miss Foster, Miss Parish, and Miss Bidell were all capital mountain climbers, and kept ahead of the party. None of us seemed the least afraid of earthquakes, snakes or wild animals, and, laughing and talking, we continued the path for about another mile, plucking wild flowers and picking wild ferns that grew out of the boulders of the rocks. Now and then we crossed some deep ravine, treading on a torrent of dried-up mud.

We believe that there must be a volcano somewhere above in the mountain, and that, when it wakes up, it throws up mud instead of fire and brimstone, for the gaps in the mountains were in many places filled with mud, as hard now as the very rock. At last we reached the Moreno coal mine; here in the side of the mountain one could see the cuttings of explorers, and there, as sure as life, were the seams of coal before us, we all cut away at the mountain side and brought off as much of the coal mine as we could well carry. Mr. White gave it as his opinion that it was not coal at all, but we believe with Mr. Moreno, that it is coal, and that by boring through the mountain, coal the same as in England will be found; on all sides hereabouts we came on loose piles of slack, or small heaps of coal dust, just what one would see outside of a blacksmiths shop; hard, brittle, betuminous or anthracite coal Mr. Moreno insists, exists in the bowels of the mountain, and we are with him, and we hope that Congress will vote a few dollars to bore for coal in these mountains. Even the railway has a deep interest in the question and should get out machinery and make proper explorations. The day they bore through the rock and sand, and find the real coal, our toast at the banquet will be realized, and we shall have 1000 subscribers in less than a year in Mendoza. We brought back with us some samples of coal which Mr. Livesey has kindly promised to send to London to his father, to have analyzed. We also brought back a piece of the rock which we broke off with the hammer, and in the very heart of the stone are the most perfect forms of beautiful ferns petrified. This wonderful sample of the handy art of nature, we have now on exhibition in our office, and invite our readers to come and have a look at it, before we send it to Europe. We all descended the mountain, tired enough at our coal explorations, and reached the deserted village at the foot of the mountain, close on sundown; we drove back rapidly to the city; that night the Government and Municipality gave a grand ball in the theatre, and all the belles of Mendoza were preparing for the fete.

THE CHURCH QUESTION.

The struggle between Church and State which has so much occupied public attention in Chile and in Brazil, has, we regret to say, extended to the Plate; and although there are few countries in the world where there is less political and religious fanaticism than in this, still, it is to be deplored that such a conflict should arise. We shall offer no opinion as yet on this burning question, and merely publish the official documents; but, to our mind, the day is not far off when the coalition between Church and State will be sundered; nor can we for a moment believe that the Catholic religion, or in fact any Christian religion, would suffer by the change.

The following is the Government decree issued yesterday:—

Considering.—The documents put in evidence in this question, and the opinion of the Attorney General thereon, and Furthermore.

1st.—That the Capitular Vicar and Governor of the Bishopric of the Diocese of Cordoba, "in sede vacante" has published a Pastoral in which, invoking documents from the Holy See which have not obtained validity in this republic, he exhorts the faithful to obey same, thereby ignoring the Supremacy of the State in reference to what is required by Art 86 of the Constitution to allow of the promulgation in this nation of Bulls, Briefs ond Rescripts of the Apostolic See; and infringing Arts 5 and 6 of the Judicial Act of September 14 1863: That he attacks the liberty of conscience guaranteed by the Constitution, by condemning the conduct of those who, in obedience to the laws, observe religious toleration in the acts of civil life; that he perverts the spirit of the laws of Congress and the aims of the Government by preventing the Catholic part of the population from deriving those benefits which the schools are intended to confer; that he ignores the right of the Government to organise the said schools in conformity with the Constitution and the laws; that he incites the people to regard the authorities of the nation as hostile to sound principles; that he proclaims the supremacy of the Church over the State by challenging the right of the latter to exercise its sovereignty: That he denies to the school corporations established by Government the right to approve or disapprove the acts of their pupils; that he attacks, in the name of the Church, the liberty of the Press, which is guaranteed by the State, doing injury to legitimate professions that are protected by our political institutions, availing himself of the authority which the State confers on prelates in their character as public functionaries; that he threatens social order by raising a controversy that disturbs men's consciences; and, finally, that he attacks the very foundations of the civilization that it has cost the world so much to acquire, and which are the bases on which the greatness and happiness of nations rest.

2.—That the Act referred to and law 33, cap 6, book 1 of the "Recopilacion de Indias" authorise Government to adopt repressive measures in this case.

3.—That, even if the law did not so provide, the duty of the Government is fundamentally embodied in its obligation to preserve order, and encourage the development of society, the main spring of which is liberty of conscience, and avoid everything that might produce disorder and strife in the nation.

4.—That it is not allowable, under pretext of a religious propaganda, or in obedience to the doctrines of the Church, to attack the bases of society and the legitimate authority of the public functionareis.

5.—That such acts, censurable and liable to punishment in any inhabitant of the country, assume the gravest character when they emanate from a public functionary who is bound to respect the laws and cause them to be respected, and who thereby falls under the jurisdiction of the Government.

6.—That the Capitular Vicar of Cordoba has rebelled against the legitimate administrative acts of founding the Normal School of Cordoba and others like it, without any protest being made anywhere against institutions that have produced and are producing most beneficent results for the progress of the republic.

7th.—That even if this opposition to dissenting schools were legitimate—which it cannot be while our institutions exist—it is an abuse to call, as the vicar has done, those establishments, whose Directors are not Catholics, Protestant Schools.

8th.—That, as the Attorney General says, this kind of logic and this system of intolerance would speedily reach the length of forbidding Catholics to attend the National Colleges and University lectures, as there are Professors of sundry creeds in those establishments; and, what is still more serious would prevent even social contact between sitizens of different creeds, thus producing the most terrible evil that can afflict a nation, and unheard of in the present state of civilization.

9th.—That the Government, wishing to act with every moderation, wrote to the Cordoba Chapter about the vicar's Pastoral, asking it to take every step in its power to mitigate the pernicious effects of the Pastoral, thus placing the case before a court best suited to try it, and which could bring the writer of the document to reason and repair the mischief done.

10th.—That the Chapter declared itself bound to support the Pastoral, and refused to use its ecclesiastical authority, declaring it had no jurisdiction, which is untrue, and thus again endorsing the Pastoral and its doctrines.

11th.—That the Chapter, in claiming complete independence of action for dioces an prelates as only responsible to God and the Church, appears to think that it can evade the action of the civil power by styling its acts religious duties, which cannot be allowed, as it would constitute the prelates as an "imperium in imperio" whenever their consciences might lead them to violate the laws of the nation, which the Bishops, as a condition of their sacred calling, swear to respect.

12th.—That the Cabildo, in expressing an unasked opinion on the principles and proceedings of the Executive, is clearly guilty of disrespect for the authorities of the nation.

13.—That, in spite of the unisemily language of the Cabildo, what the Attorney General says on the point may be accepted as extenuating, to some extent, its presumption.

14.—That, the Cabildo having refused to excercise its authority in the case, the Executive is obliged to exercise its preventive attributes.

Therefore—In view of what is herebefore set forth, and of the official precedents invoked by the Attorney General; and in accord with his conclusions on the point at issue, the President of the Republic *decrees*:—

Art 1.—Dr. Canon Geronimo E. Clara is hereby dismissed from his office and emoluments as a member of the Chapter of the Cathedral Church of Cordoba, and, consequently, also from the Governorship of the Bishopric.

Art 2.—Let the particulars of this case be laid before the Public Prosecutor of that province, that he make take such action as it demands.

Art 3.—Let the terms of the note of the Chapter, to which the Attorney General has referred, be ignored.

Art 4.—Let this be communicated etc.

ROCA.
E. Wilde.

REPORT UPON THE UNIFICATION OF LONGITUDES AND A UNIVERSAL TIME.

(Concluded.)

The facts of Nature demand a certain recognition; and the absurdity of the attempted change differs in degree only, not in kind, from that of a division of the year into a given number of equal lunations, or the month into a round number of equal days. The large deviation from the truth, in the standard of time thus imposed upon the inhabitants of regions near the boundaries of the proposed sections, can sometimes amount to three-quarters of an hour; and the moment to which the name of noon is thus given would divide the day into two unequal parts, where inequality would, at certain seasons of the year, be very little less than an hour and a half. A man visiting his next door neighbour might find his watch to be an hour wrong. Such incongruities embarrass the affairs of daily life.

Only some very strong necessity could justify such inconveniences and violations of natural laws; and no necessity exists. The only proper solution of the difficulty is by the establishment and maintenance of a distinct system of time, through the employment of a separate meridian for purposes other than local. This is now done by all navigators, all telegraph companies, and all railways of magnitude; and the reform now proposed by the International Geodetic Conference is simply that this separate meridian shall be the same for all, and in every part of the globe, and be likewise available for scientific purposes. The inconvenience of maintaining simultaneously two systems of time is reduced to a minimum when they are so different as to preclude all danger of confusion, when they are easily convertible, and when one of them is identical for all the world. The method now proposed for attaining this end fulfils all these conditions; it entails less sacrifices than those required for the so-called "standard time" of the North American railroads; and it cannot fail to afford practical, commercial and scientific advantages, while adding one more to the various bonds which are, of late years, uniting the nations of the earth in closer relations.

The only remaining resolution of the series, which has a scientific bearing, is that which expresses the hope that Great Britain may recognize in this general adoption of the meridian of Greenwich, as the common point of departure for the fixation of longitudes and time, the desire of other nations to dispense with all considerations of national pride or prepossession, for the sake of the general interests of humanity; and that she may respond by giving her support to another and still more important undertaking of the same nature, in joining the Metric Convention of 1875, May 20. This is the Convention under which the International Committee of Weights and Measures is conducting its Bureau at Paris, concerning which I have recently addressed another communication to Your Excellency.

The action to which Great Britain is thus invited does not in any way involve her adoption of the metric system, which is already legally optional; but it is simply a co-operation in the work, now going on, of perfecting the fundamental prototypes to be distributed to the various nations which form the Convention,—and of effecting accurate comparisons with the present and past standards of measures and weights in different countries. It may be mentioned that Russia, in whose territory the use of the metric system is not yet even legalized, has been from the beginning among the most efficient supporters of the International Bureau.

Having thus frankly expressed my opinions upon the subjects on which Your Excellency has done me the honour of requesting them, I beg to offer the assurance of my high respect.

B. A. Gould.

Cordoba, May 15, 1884.

ROSARIO.

(From our own Correspondent.)

June 6th.

When I wrote my letter, speaking of the Port Works of Rosario, I had no knowledge of the Report of the Engineer, Mr. Pirovano, which must have been then in print in the native papers, and which I see you have translated in last Saturday's *Standard*. If on one hand it is satisfactory to learn that the Government has not thrown the project into the waste-paper basket, on the other hand, it is not all at consoling to find out that so much time has been lost in preliminary surveys, and that these are by no means concluded. With all due deference to Mr. Pirovano, I venture to assert that all that has been done might have been accomplished by a competent man, with zeal and good-will, in a month or even less. In proof, let me see what has been done according to Mr. Pirovano himself. He says that four engineers are constantly engaged in the surveys and collecting data of the properties which will have to be expropriated.

When we remember the whole area of the projected works does not occupy 15 acres, the greater part already Government property, one cannot be much dazzled by the magnitude of the labour required. "Determining the situation, direction and depth of the canals and transverse section of the Parana river, fixing the position of the islands and banks, the changes of the levels of the river, the strength of the currents and the topography and levelling of the shore from the Graneros or Elevator to the Western Santa Fe Railway," are phrases that seem to imply gigantic efforts of labour and intelligence, when the truth is four experienced engineers, or even one with a few peons and boatmen, ought to have finished this part of the work in a fortnight. The only really important work, that of ascertaining the condition of the bed of the river and the possibility of extending the wharves to deep water on firm foundations, has not been commenced yet; Mr. Pirovano says he must wait for a low stage of water. However he confidently hopes that the surveys will be finished this month, when he hints that the estimates will take an equally lengthy period to study. If the works be as sure as they are slow we ought to be happy, and, with the old nigger, say "bressthe Lord."

After writing the foregoing, I have read a leader in the *Capital*, which takes exactly a similar view of the subject as I do, and judging of the slow progress of the preliminaries, is very despondent as to the speedy completion of the works.

It is very common in this agricultural province of Santa Fe for the farmers to talk of "old and new land." Of course with our virgin soil composed of from twelve to twenty inches of vegetable mould, we cannot have any old, that is to say exhausted, lands. The term is applied to lands that become choked with weeds. It is a a very singular fact that in our Pampas we only find the Pampa grass growing in huge tufts, between which the earth is bare. This earth, notwithstanding contains, and has probably contained from its origin, the germ of numerous other plants. We must, in this case, discriminate between "germs" and "seed." No seed could remain in the earth without rotting. Can it be that the germ is the soul of the seed, and, under circumstances, animates a body? This is one of the mysteries of Nature, but the fact is palpable to all. Turn up the Pampa lands with the share of a plough, and, lo! weeds familiar to us in other parts of the world spring up as if by enchantment. The richer the soil the more abundant are they, awakening as it were from a sleep of a thousand, or ten thousand, or a million of years—who can say? This phenomenon we are witnessing every day in Santa Fe, and, in fact, all over the Republic and everywhere else. Now we know that the more weeds that spring up after cultivating the earth the richer the soil must be; but our slipshod system of farming ignores this fact. Perhaps it may be said that at present it does not pay to go to the extent of cleaning the land, and the cultivator seeks new Pampa land, where, for a couple of years, he is not troubled much with weeds. But there can be no manner of doubt that the seed weeds properly treated enrich the soil, and if turned under at the proper time, the land would give bigger crops than new Pampa land would. This, however, would entail labour, and labour is costly, so the weeds are allowed to keep possession of the soil. We must needs say, notwithstanding, that there is some advantage in this lazy system; the Pampa lands and Pampa grass are invaded on a larger scale by agriculturists, greater extensions of land being consequently reclaimed every year. The rich weedy lands never go back into Pampa grass, and if the indolent agriculturist does not make use of them they offer fair pasturage for cattle.

In older countries the exuberance of weeds on his ploughed fields would delight a farmer, as denoting a fertile soil. I have been reading a correspondence of the *Times* from Florida, U.S., where an English company have lately bought two millions acres of land. There is there a luxuriant plant called the "beggar weed," unknown in England, which springs up where the gronnd is stirred by the plough. Captain Gambier, one of the directors of the "Florida Land and Mortgage Company," says that this weed comes up in the cornfields after the crop receives its last working, as thick as grain in a well-sown field, and about the time the corn blades are stripped this weed is knee-high. At this period the summer rains begin and the summer sun is the hottest, so that under their combined influence "the beggar weed beggars description." By the end of August it stands six feet high, when it is turned under, and a second growth immediately springs up from the weeds, which is also turned under before the winter," Captain Gambier says—"Farmers who know the value of a turned sod as a fertilizer, can appreciate the worth of this enormous double crop of weeds as a compost, and, comparing it with the toll taken from the land in the corn crop, he easily sees on which side the balance stands." He adds—"It has been the presence of this plant in Florida that has saved his lands from ruin under the vicious system of farming carried on." In this Argentine country the farmer curses his luxurious crop of weeds, and when they overgrow his fields he gives up the cultivation of the land!

I have been waited upon by a deputation who ask me to pass a vote of censure, on behalf of the *Standard* subscribers in Rosario, on your Chief for his culpable—indeed one said scandalous—neglect of them. They want to know why they are not given a chance to call on him, welcome him and perchance give him a dinner. I know they are capable of any extravagance. But your Chief, on his arrival in Rosario, is apparently in the greatest hurry to get out of it again, and few of his friends have a chance of shaking hands with him. Your correspondent was fortunate to meet him by accident on the tram, and, of course, laid in a supply of gladness for six months.

The energetic Captain Manton has extended his telephone line to San Lorenzo and Roldan. Mr Fisher is the first Railway Manager in the country who has had the enterprise to make use of the telephone on the Central Argentine. By an arrangement with Captain Manton, a telephone of peculiar and simple form, is carried in every train, and if any necessity arises to communicate between stations a connection can be made by throwing a wire over the telegraph wire.

On Wednesday night a dastardly outrage was committed in a central street, on Dr Pedro Rueda, a prominent lawyer here. Two ruffians, probably hired for the job, attacked him, and before assistance was obtained Dr Rueda was dangerously beaten about the head and body. One arm was wrenched out of the socket. One of the men has been apprehended.

Although so many of Lamport and Holts steamers are coming to this port for all that, so much cargo from up the river is coming down consigned to these steamers, that Captain Ferguson has had to refuse no less than 1200 tons for want of vessels, the Hogarth with her cargo engaged, and the Effective now discharging 1000 tons sleepers, proceeds to San Pedro and Zarate to load full cargo of maize for Hamburg.

We expect in a few days the well-known and favorite Lamport & Holt steamer Euclid, with our old and esteemed friend Captain Pym in command. Captain Pym will receive a hearty reception from our shippers here.

W. P.

LONDON LETTER.

(From our Own Correspondent.)

THE "TWO THOUSAND GUINEAS"

May 2nd.

Gentlemen in Buenos Aires who are training and breeding race horses, will be interested in the most important sale of horses which has taken place for many years. It was held at the early part of the week in Matthew Dawson's paddocks, behind Heath House, where the whole of Lord Falmouth's horses in training were brought without reserve to the hammer. The prices realised reached the remarkable average of 1,500 guineas. One of the horses, "Harvester," was sold for 8,600 guineas; another, "Busybody," for 8800 guineas; another, "Louisbourg," for 4000 guineas, and so on.

The competition was animated throughout, but the great excitement occurred when 'Harvester' appeared on the scene. The colt held a prominent place in the betting on the Derby and Two Thousand Guineas. Lord Calthorpe commenced bidding at 4000 guineas, but the price soon rose, and he was finally knocked down to Sir John Willoughby for 8600 guineas. Mr. Dawson, the auctioneer, congratulated the buyer on his purchase even at so long a price, and said, "he hoped Sir John would win the guineas." Fate decreed otherwise, as will be seen in the account of that race. Many competent judges considered 'Harvester' and 'Busybody' so good a pair that they would not only have the best chance at Newmarket for either of the 'Thousands,' but that they would sweep the board of all the great three years old prizes. These predictions are seldom verified, and the vicissitudes of fortune are great, even with 'bona fide' winners of the "Two Thousand." "Marquis," which won the race in 1862, was sold the other day in Australia for 21 guineas.

The remarkable sale of Lord Falmouth's horses gives such interest to the Newmarket meeting on Wednesday last, I quote some details of the event. On the day of the "Two Thousand Guineas" the day was cloudy and the attendance was not as brilliant as in olden days when sportsmen like Mr. Merry, Lord Stamford, Sir Joseph Hawley and the Marquess of Hastings patronised the turf. The cards gave the following names and weights:—

The Two Thousand Guineas Stakes, a subscription of 100 sovs each, h ft, for three years old; colts, 9st; fillies, 8st 9lb; the second to receive 200 sovs out of the stakes, and the third to save stake. R.M. Eighty one subs.

Betting at Starting

3 to 1 against	Scot Free
7 — 2 do	Royal Fern
4 — 1 do	Superba
1 — 2 do	St Medard
10 — 9 do	Sister to Adelaide colt
20 — 1 do	Harvester
25 — 1 do	Beauchamp
100 — 30 do	Doncaster Cup
100 — 1 do	Prince Rudolph
100 — 1 do	Hermitage

Previous to the race all the horses were saddled within the Birdcage, except Superba, the Adelaide colt, Hermitage, and Royal Fern; but Superba, prior to the completion of her toilet, was walked round, and created general admiration, even though the filly had grown little since her two year-old days. Harvester lathered considerably, and was not fancied by the cognoscenti; but St. Medard, a bright, almost golden, chestnut, somewhat on the small side, gave general satisfaction. Scot Free, who is a brown, with much quality, had evidently undergone a splendid preparation, and was universally voted the "gentleman" of the party. Beauchamp (a son of Beauclerc), like Doncaster Cup, looked as if he wanted more time; whilst Prince Rudolph seemed out-classed in such company. After some trivial delay at the post, the ten runners were despatched on fair terms. Harvester showed slightly in advance; but early in the race Scot Free took up the running, and won with consummate ease, St. Medard, ridden out, being a bad second, with Harvester, who ran fairly well, third.

The fact is "Scot Free" won contemptuously in a canter by several lengths. After "Harvester" was purchased by Sir John Willoughby he was tried in a fair spin and was found so sadly wanting that his getting a place at all in the race was a matter of surprise to those who on seeing his performances had quickly withdrawn their support. He was only beaten by St. Medard by a head.

The Daily News says:—

"History has repeated itself in the Two Thousand Guineas, for Scot Free galloped home just such an easy winner as his sire Macgregor did fourteen years ago, and started, like him, a very strong favourite. Those who are superstitious about "a good horse never having a 'bad name' will assuredly have put their trust in Scot Free, for a son of Macgregor and Celibacy could not have had a happier selected for him. But it is only recently that he has been known by this name, for he was originally called Donald II.—to distinguish him from another horse named Donald—and by a very remarkable coincidence St. Medard, the horse which ran second to him, has also had his name changed, and was at first called Crusader II. The lovers of long odds might seek in vain during years to come for such a combination as this. The parallel between Scot Free and his sire cannot be carried any further, for the son is not engaged in the Derby, during the contest for which Macgregor broke down, and his owner must deeply regret the omission, for to judge by the way in which he won yesterday and the probable weakness of the opposition, he would have stood a very good chance of securing that 'double event' for which so many Two Thousand winners have struggled in vain. The most peculiar incident of the race was not, however, the victory of Scot Free or the downfall of another favourite, but the way in which Harvester ran after being sold for the enormous price of 8,600 guineas. The success of Scot Free is the more gratifying because he is trained by a man who has only recently taken to this calling after having been for many years one of the finest horsemen of his day, and if Chaloner displays the same ability in this line as he did in the saddle he will have few, if any, superiors."

"Scot Free" is not entered for the Derby, but his name figures amongst the St. Leger candidates.

N. BRITISH AND MERCANTILE INSURANCE COMPANY.

We have received the the Annual Report and Balance Sheet of the North British Mercantile Insurance Company which is too lengthy for publication in our columns, and we can only refer to the most salient points.

The Capital has been increased by the issue of 20,000 new shares of £25 with £6 5s. paid up, which were all taken up by the shareholders at the fixed issue price of £15 premium per share, whereby the Reserve Fund was increased by £300,000.

In the Fire branch the net receipts from premiums and interest, exclusive of the £300,000 premium on new shares, exceeded £1,187,000, and the losses after deducting re-insurances to over £672,000. The life claims and annuities paid were over £397,000, so that the total losses during the year were considerably more than one million sterling; the total receipts from premium and interest in both branches being £1,738,000.

We extract the following from a leader of our contemporary the *Review*:—

The annual report of the North British and Mercantile Insurance Company, which will be found on page 225 of this issue, shows a considerable increase in both its financial strength and the dividend declared over the accounts published last year. These results are naturally to be looked for in the augmented prosperity of the business of the office. To commence with, the percentage of fire losses to premiums is only 60,75 per cent. for 1883, as against 62,36 per cent. for 1882, the net fire premium income having risen from £1,086,566 to £1,107,745, being an increase of £21,179. The net losses by fire during 1883 were £672,825, which amount includes a full estimate of all claims that have been received prior to December 21 of last year. One-third of the net premiums have been set aside to provide for liabilities on current policies, leaving a balance to the credit of the profit and loss account at the close of the year of £223,303. To this sum must be added what is called the premium reserve, amounting to £369,248, and the general reserve, equal to £1,144,576, being a grand total of £1,737,129 as the balance of fire funds available for the necessities of the fire branch of the North British and Mercantile Insurance Company, subject to payment of dividend and bonus.

On December 31, 1883, after providing for the dividend and bonus payable in 1884, the paid-up capital, fire reserves, and undivided profits amounted to £2,217,235, being a formidable aggregation of financial strength, and one which, we venture to say, is at present unique in fire insurance. This, of course, is entirely distinct from the life assurance account, for when the total assets of the company come to be examined, we find on the assets side of the balance sheet a total sum of not less than £6,579,770 standing to the credit of the company, in account with its policy-holders and shareholders.

The growth of this colossal corporation has been of a marvellous character. It has not merely been well administered, but it has also been lucky. Nevertheless, it is rather a curious fact that luck and good management, by some singular process, seem to go hand in hand together, and the North British and Mercantile and two or three other offices that might be named appear to enjoy the felicity of carrying good fortune with them and of defying fate. The series of catastrophes that troubled the fire insurance world for some years past have, so to speak, been simply ripples on the great lake of security on which offices of this kind repose. By diligent abstention from undue declarations of barely-earned dividends in their youth, they have succeeded in accumulating vast reserves, to the interest upon which the shareholders can look for their dividends whilst the fire insurance business of a given year, to a certain extent, may be left to take care of itself. Upon the system of averages and the cosmopolitan, we had almost said universal, extension and character of the fire insurance business in such a company, heavy losses in one part of the world are naturally counterbalanced by heavy premiums from other quarters of the globe.

EDITOR'S TABLE.

The supplementary mail for the Nord America will close to-morrow at 1 p m.

Lord Dormer and Mr. Callan M. P. took leave of their friends yesterday and left for Montevideo, to catch the Britannia. Lord Dormer goes home much pleased with this country, although its flora and fauna, which he mainly came out to see, disappointed him. He was charmed with the wonderful natural beauties of Paraguay, but shocked at the desolate depopulated condition of such a superb country. He takes home with him many photographs of the land of yerba, from Asuncion to Salvador, done by himself. During the trip his tents and some of his instruments were destroyed by fire near Salvador, owing to the three peons left in charge having gone deer-stalking in his absence; and his lordship and Mr. Ball, his "compagnon de voyage;" had to sleep in hammocks slung to trees for three nights of the most terrific rain.

Our talented colleague "Anacarsis" in the *Diario* rejoices that ladies now go to the pit at the Colon, to hear the opera, and that the 'swells' don their swallow-tails and white chokers. Years ago we suggested this reform, and are glad to see it at last making its appearance.

The Damas de Beneficencia have just come in for a windfall, in the shape of a legacy of $ 65,000m/c left them by the late Mr. Miro.

A Scab Bill was laid before the Provincial Chambers yesterday. It divides the camps into 20 sections. No additional taxation will be imposed, but the Bill provides heavy fines for infractions.

The Argentine "Horse Guards" is now in the old Plaza Parque station. President Roca and the Minister of War paid a visit of inspection to the place on Friday.

Mr. Thomas St. George Armstrong left yesterday for Europe in the Nord America. We wish him a pleasant tour in the old world.

We are happy to say that telegrams were received yesterday from Mendoza announcing that Mrs. Barker is much better. She leaves that city to-day for Buenos Aires.

Cedulas E	89½
Cedulas F	85
National Bank Shares....	150½
Scrip.....	70
Argentine Gas Shares....	108
Beigrano Tramway.....	5 o/o

The share market closed so weak last night that all anticipated a sharp fall this morning. All the matutinal symptoms pointed in this direction, and at an early hour the ring was crowded with sellers of shares for the end of the month and for July. There was a moment when the bulls actually began to bear the market by sales for the end of the month. The Bear King was in his element as he came down on the market with all his forces, and the Bolsa floor appeared to give way under the pressure; but the forecasts of the augurs fell to the ground as the bulls stepped forward and offered to buy up every share in the market for July. The Bear King let go about 5,000 shares and a leading bull bought up as many and more for July. That the bears were beaten all over the line none can deny, but that the atmosphere of the Bolsa is very bearish in spite all must acknowledge.

The speculation this morning was on such a gigantic scale that we must look back two years to find a precedent. Five thousand shares were sold for the end of the month; the market opened at 151 and fell rapidly to 149½, when the bulls made a push, putting rates up to 150½, closing price. Ten thousand shares at least were sold for the end of July, the market opened at 152, fell to 150 and closed at the opening rate. The fight at the ring was a pitched battle between bulls and bears, and the excitement during official hours was intense. The Bear King has entered the arena and is backed by a strong body of followers—all men who have operated successfully for the last six months. They are opposed by a ring of bulls, considered to be the most powerful ever formed in this market, and with a plethora of money to help their speculation. The issue of the fight depends on the great cover—money. If the bulls secure the money they may laugh at and corner the bears. Affairs on the Bolsa, at all events, are entering a very lively phase—outsiders are becoming wary under the circumstances.

Cedulas were completely forgotten in the excitement of the share speculation. A few thousand E changed hands for cash at 89½ and F at 85. Twenty thousand of the latter were sold for the end of the month at 85 also.

A few shares of the Belgrano Tramway Company were sold to-day at 2 o/o. and 100 more were offered at the same rate. This is, indeed, a fall. A few hundred Argentine Gas Shares were sold cash at 107 and 108.

The exchange market looks somewhat better; the pressure is no longer so great, and the scare is abating. The state banks did little business to-day. The private banks have done a fair business for this mail, having drawn large amounts. Brokers look forward to firmer rates next week, and the new credits of the National Bank have made favorable impression in the market. Discounts shew no change and the situation is easy. Government Bills are quoted at 7 o/o. Something done yesterday at this rate.

The following were the sales at the ring during official hours:—

Cedulas—
For cash E 15,000 at 89½
For cash F 52,000 at 85
For June 30th F 20,000 at 85
Sales, 67,000
National Bank Shares—
For June 30th 4,700 at 151-150¾-150-149-½ to 149½-150½-½-½-150-½-¾
For July 31st 7,500 at 152-151½-151-160-½ to 151-½-½-½-½-152
Sales, 12,200
National Bank Certificates, 40 o/o paid—
For cash 100 at $70
For June 30th 250 at $70
For June 15th 100 at $70
Sales, 450
Argentine Gas Shares—
For cash 257 at $1,070 and 1,080
Belgrano Tramway Shares—
For cash 22½ at 5 o/o

Mr Cane, the auctioneer, will sell by auction to-morrow (Sunday) at 1 p.m. several fine lots of land in the Boca in front of the General Brova tramway station. The lands are situated between Defensa and Balcarce; the tramway concession through the latter street has been granted to Mr Ballesteros, and these lands will soon have tramways running at both fronts. Lands in the Boca are in better demand and at recent auctions as high as 49 m/c per square vara has been paid for land in the vicinity; the principal purchasers of these lots were small Italian capitalists.

Mr Latzina's invaluable monthly trade figures of the Buenos Aires Custom House are out; we take the following figures from same—

	May 1883	May 1884
	$m/n	$m/n
Imports....	5,244,000	7,161,000
Exports....	4,583,000	3,862,000
	9,827,000	11,023,000

The following are the trade figures of the Custom House for the first five months of 1884 and 1883—

	1883	1884
	$ m/n	$ m/n
Imports....	26,367,000	28,890,000
Exports....	25,509,000	29,323,000
	51,876,000	58,213,000

The trade of Custom House for the last five months is distributed as follows:—

	Imports from	Exports to
	$ m/n	$ m/n
Germany.....	3,149,000	3,605,000
Belgium.....	1,695,000	7,767,000
Brazil.....	878,000	316,000
Chile.....	3,000	83,000
Spain.....	2,071,000	350,000
United States..	2,036,000	802,000
France.....	5,297,000	12,244,000
Italy.....	1,402,000	773,000
Holland.....	386,000	—
Paraguay.....	326,000	35,000
Portugal.....	5,000	—
Gr. Britain....	10,590,000	1,437,000
Uruguay.....	1,055,000	1,692,000
Various.....	841	159,000
	28,890,000	29,323,000

France ranks first in our foreign relations, England comes second and Belgium third.

The Loire will leave to-morrow morning for Patagones, Santa Cruz and Puerto Deseado. She has been ordered by the Minister of War to steam as far as States Island. She takes some emigrant families to the colony at Fuerte Roca in the valley of the Rio Negro.

Messrs Bollini & Muro have sold the fine site, occupied at present by the German Club Germania, for $19,900 m/n. Purchaser, Mr. Fürgensen.

A great crowd of friends left in the Nord-America to-day. She leaves with a full passenger list, too long for publication in these columns. They will all be in Europe before the end of the month. The Veloce company is securing the bulk of the River Plate passenger traffic to Europe.

The modifications proposed by the National Government in the Riachuelo and City Improvement loans bills have been sanctioned by Congress. These two loans amount to 12 million dollars. The sanction of these modifications removes all difficulties raised against these loans in London.

The attention of merchants is called to a notice from Lloyd's agent requesting consignees of cargo per Dalton and Leibnitz sunk in the lighter "Trueno" to revise their goods as quickly as possible.

The sale of 2 fine lots of land in La Plata near the square and alongside the Governor's house is reported. Mr. Alexander McLean purchaser price paid 40,000 m/c. We congratulate him on his purchase.

The fashionable peluqueria in Calle Cangallo next the Bodega was sold off by judges' order yesterday, and this judicial sale attracts all the more notice owing to the city bankers having raised their charges.

Mr. Zavalle, from Venado Tuerto, was welcomed; he reports business so brisk out there that there are not carts sufficient to carry the goods, posts &c. The camp is in splendid condition, and new settlers are building houses, putting up rodeos and sheep puestos.

The German steamer Bahia is now in San Lorenzo receiving 1000 tons wheat for Hamburg.

The steamer Ravmoor (Eng.) is also at San Lorenzo, loading wheat for Antwerp. The steamer Ingram loads 1000 tons in the port of Rosario.

We hear that a contract for 3000 tons has been entered into at 16 frcs. to be loaded at San Lorenzo, which is destined to become the greatest grain loading port in the province of Santa Fé.

A meeting of the Applicants for Shares in the Argentine Lighter Company, Limited, will be held at 77 Calle Maipu on Wednesday the 11 inst. at 3 p.m. The business of the meeting will be to discuss the articles of Association in the form in which they have been returned from England.

The arrivals of wool have been small during the week. The few lots offered were all sold at the prices of the previous week, if we except good wools which fetched 5 per arr. more; that is to say 90 per arr. wools were sold at 95 per. Our colleagues are all astray with regard to their estimates of the stock of wool in deposit. There are at present about 150,000 arrobes in deposit at a maximum calculation. We may expect 100,000 arrobes more from the camp; there must be a fair quantity of wool outside, since this week one "acopiador" sold his stock in Las Flores—about 20 to 25,000 arrobes. Advices from Europe announce no rise in price, but a very firm feeling. All the wool-buyers will soon leave for Europe; holders of wool must sell soon or remain with their stock and be prepared to lose money. The season is drawing to a close and the sooner the few lots remaining are sold the better for the holder.

A few hundred certificates were sold during afterhours at 67 and 68—a fall of 2 in a few days.

Exporters, wool buyers, consignees, barraqueros, grain merchants and the whole market are raising a hue and cry against the mismanagement of the Western Railway. We have worn off the edge of our editorial pen writing against the wretched organization of affairs in this great trunk line—once the model railway of South America. The state of affairs at present is simply scandalous, and since the Board appears to be deaf the men of the Once are determined to call the attention of the government to the matter. Immense quantities of grain remained on the camp, in the stations, waiting for the waggons that never come and are always promised. The farmers who took their grain through to the Catalinas mole complain of the delays at the Retiro where the waggons are kept stationary at their expense, entailing a charge of $20 per waggon per diem on the plea that the Catalinas Wharf Company cannot receive the produce owing to the agglomeration of foreign merchandize. Will it be credited that the grain men of the Once are actually loading carts with grain to load the lighters in the Paseo Julio? Under such circumstances it is idle to talk of export of maize or wheat to Europe, and the nuisance is becoming so intolerable that the many who suffer by this state of affairs are determined to apply to Governor D'Amico for redress. "No waggons?"—this is the phantom that haunts the men in the grain market.

Messrs. Thomson & Co., as representatives of Messrs. Mills & Merriindale, have made a contract with the National Government to supply from 60,000 to 100,000 quebracho sleepers for the extension of the Tucuman Railway to Salta. Messrs. Pereyra & Nevares were the brokers engaged in this important business. Messrs. Mills & Martindale have saw-mill and machinery at the Rio de las Piedras, where they also possess a splendid cloth factory that supplies a great part of the Interior with cloth. A cloth factory in Salta speaks the progress of the country, and the enterprise and brains of our countrymen.

About 3,000 shares were sold during afterhours. The market opened firm at 150½, but fell gradually to 148½, closing rate for the end of the month. The weakness of the market appears to grow in spite of the bullish victory in the morning.

From the Plaza Once we have the following 109 waggons with produce arrived.

The arrivals were:—
4,800 @ of wool
1,921 bags wheat
1,409 bags maize
348 bales hay

and much hides and skins, &c.

Little business done. Prices of produce without variation.

The sales were:—
Wool—
2,500 good, 88, 87½, 80, Unzue
300 borrega, 75, do
100 bellies, 38, do
Total, 2,900 arrobes.

BANCO HIPOTECARIO
Esta abierto al servicio público todos los dias de trabajo desde las 10 de la mañana hasta las 4 de la tarde.
Presta sobre hipoteca con reembolso á largos plazos.
Por el valor del prestamo de cedulas hipotecarias que producen una renta igual al interes que cobra el Banco.
El valor del inmueble hipotecado no debe ser menor de $f 2000 n el prestamo menos de $f.500.
Los prestamos hipotecarios no pueden exceder de la mitad del valor del inmueble.
El interesado se obligara a pagar una anualidad que dure todo el termino del contrato. La anualidad se compone del interes del capital prestado, del fondo destinado á amortizarlo y de la comision del Banco. La anualidad se divide en trimestres, y las cedulas que al presente da el Establecimiento son:—
Serie E.
Dura 20 años 100 dias 6 o/o de interes, 2 o/o de amortizacion y 1 o/o de comision.
Pagadas las anualidades convenidas por todo el tiempo del contrato, queda la hipoteca redimida, y libre el deudor de las obligaciones hacia el Banco. El deudor podra libertar el inmueble, en todo o parte, anticipandose el contrato.
El que pretendiese prestamos del Banco se presentara por escrito, designando el inmueble que ofrece en hipoteca de una manera precisa, acompañando los titulos de propiedad, los boletos de contribucion directa y espresando al mismo tiempo su estension el gravamen, o los gravamenes que deben ser levantados simultaneamente que se constituya el credito hipotecario. En la Secretaria encontraran el formulario y las tablas de amortizacion.
Los deudores por trimestres haran las entregas de 8 a 15 de Enero, 8 a 15 de Abril, 8 a 15 de Junio, 8 a 15 de Octubre.
Con el fondo cobrado por amortizacion, se rescataran cedulas por sorteos a la par, y con anticipacion de un trimestre.
Las ventas de las cedulas trimestrales las pagara el Banco de 1 a 15 de Enero, de 1 a 15 de Abril, de 1 a 15 de Junio y de 1 a 15 de Octubre.
El Banco podra servir de intermediario gratuito entre el capitalista y el hipotecario para la colocacion comercial de las Cedulas. A este objeto recibira depositos sin interes, que para su colocacion tendran la prelacion con que entraron al Banco.—Estos depositos pasaran al Banco de la Provincia.
El mismo Banco hipotecario recibe sus cedulas en deposito gratuito, dando al depositante una libreta que servira de certificado del deposito.
El deposito se admite desde una cedula de $f.50 que es el minimum de las que emite el Establecimiento.

A Derangement of the Liver:
THE CAUSE OF DISEASE
IN THE
STOMACH, KIDNEYS, AND Nervous System.
Below will be found a brief summary of a Lecture upon the Liver, delivered before the Eclectic College of Medecine, by
Dr. J. Haydock
The Liver has been known as the great blood-maker and blood-purifier of the circulation From its size and spongy structure, it plays a most important part in the animal economy, as regards assimilation and nutrition. Food taken in the mouth and acted upon by the digestive organs of the stomach is converted into Glucose and Peptone, and in these forms enters the Portal vein. Here, by the action of the liver, these substances are converted into a form of sugar and pass out of the liver by a large vein, called the Hepatic vain, into the great circulation. The new material now formed serves two purposes: viz: the maintenance of heat in the body and assisting in the cell growth of the system.
Dr. Murchison says "The composition of bile and its secretion is very complex. It is constantly being secreted by the liver, and, increasing suddenly before eating, gradually decreases as soon as the appetite is satisfied and feeding ceases." Now, if this most important organ of the body becomes torpid, or the passage of bile interfered with, emaciation and disease ensue. I note eight marked peculiarities that now occur, and which we all know off:—
1. The patient complains of a feeling of weight and fullness of the stomach.
2. Distension of the bowels by wind.
3. Heartburn.
4. A feelingof weariness, pains in the limbs and great sleepiness after meals.
5. A bad taste in the mouth, especially in the morning, and furred tongue.
6. Constipation, with an occasional attack of diarrhœa.
7. Headache in front of head.
8. Depression of spirits and great melancholoy, with lassitude and a disposition to leave everything for to-morrow.
All of the above symptoms go to show functional derangement of the liver; and now comes the great importance of any error made as to the condition of the patient. He should immediately provide himself with a Liver Stimulant, the most common form of which is a Pill. Daily experience shows that this, when the Pill is compounded properly, is the readiest mode of inciting and promoting the action of the Liver, and can be almost always relied on. I have devoted many years of my life, as many of you now before me know, to compounding a Pill that will act readily and systematically as a Bilious remedy. I do not believe in great purgatives, and therefore have made a Pill, one of which is an active and thorough dose. I have called it
Dr. Haydock

EDITOR'S TABLE

(Continued from 1st page)

In another column we publish the decree of the National Government with regard to the religious unpleasantness in Cordoba. Everybody in town is talking of Dr Costa's legal document on this burning question; a paper that reflects the soaring abilities of the author and is a masterpiece of the "suaviter in modo" jurisprudence.

Nearly all Lacroze's tramway cars were brought to a stand-still near the Plaza Once yesterday morning, owing to a block-up at the ditches of the City Improvement Works. A bullock-cart was stuck in the mud and twelve bullocks were pulling away with all might, whilst a dozen of fellows were shouting, cursing and digging sticks into the poor brutes' prominent ribs. After a stoppage of half an hour a passage was effected and the cars managed to pass.

We have been requested by the Messrs Duggan to say that they return their sincere thanks to their friends, both in town and camp, who attended so numerously at the burial of their brother on last Tuesday. Many friends came long distances and at great inconvenience to show their sympathy, for which they beg to thank them publicly.

The entries for the Lanus Races will be opened on Wednesday next at 8½ p.m. in the Bodega. Messrs Craufourd & Huergo will on this occasion hold their first auction for these races, which will come off on the 24th.

The *Nacion's* private wire announces that Abraham Hewitt, of the democratic party, gives vent to his political feelings in a New York paper in the following terms: "The tactics of the Republicans are to fool the workmen with promises of high tariffs and protection, and the merchants with the prospects of removal of all present obstacles in trade." This is important news! and the cablegram is no doubt well worth its cost.

The Minister of the Interior has issued orders for payment of half a million dollars to continue the City Improvement Works of this city and to sink wells in the North of the Republic.

Messrs. D'Amicis and Goddio leave for the sunny plains of Italy, the latter in the Nord America, the former in the Sirio. They will bear with them the most pleasant impressions of the Plate, where they have been feted and cheered in royal manner.

The news from the West Coast is that the troops of the Peruvian Government have defeated five thousand rebels in the Department of Junin. Poor Peru continues to suffer in throes of civil war; the prospects are very gloomy, and blue ruin is staring the country in the face. Later telegrams announce a bloody battle and defeat of 8,000 rebels by Prefect Mas.

The Jujuy flare-up has been forestalled. A few shots were fired at an unfortunate sentry as a prelude to the revolutionary fray, but the son of Mars escaped and the disturbance was summarily quelled. The days of provincial prepotence are gone for ever. Revolutions and rebellions are myths' and the reign of national supremacy and provincial impotence has begun.

The Argentine man-of-war Argentina arrived in Spezzia on the 5th. The naval schoolboys will visit the Italian arsenal previous to their departure for the stormy coast of England.

Cordoba, the lethargic city of Fakirs, is going through an unpleasant degree of excitement. What with the Normal School row, the removal of the three professors in the University, and the angry Cabildo question, boys and girls, men and women, are all at loggerheads, and affairs are so critical that a split is threatening in the society of the town. Dissensions have crept into the bosoms of families, and the torch of discord is spreading the conflagration.

The banquet to Dr Bengolea came off on Friday night at the Café de Paris. The amphitrions were Vicente Casares, Roque Saenz Peña, Pellegrini C., and other intimate friends of the distinguished guest, who leaves for Europe on a pleasure trip.

There is a proposal on foot to change the name of Piedad Street for that of Dorrego. By all means let the change be effected, but it would be better still to change the granite blocks for wooden pavement.

We are asked to intimate to the Boca Tram Company that running trucks with goods, and stopping them to unload in the busiest streets at the busiest hours of the day is not conducive to public convenience. A subscriber was detained in a tram car yesterday morning for exactly twenty minutes, while a lorry was being unloaded at a shop door.

The fugitive who wounded the 'vigilante' some days ago has been captured, but it now turns out that the 'bobby' was as much to blame as the other. They were drinking and quarreling in an almacen, and on the way home set to destroy with their knives as much of beauty as nature gave them. The "vigilante" got the worst of it, but the other also bore away marks of the fray. Neither is seriously hurt.

A sailor belonging to the pilot-boat Magallanes tumbled overboard on Thursday and was drowned. His body has not yet been discovered. It is wonderful what a small precentage of sailors can swim, as almost every accident of this kind proves fatal.

The representatives of the European capitalists who have proposed to make a railway from Bahia Blanca to the Pacific, petitioned the Committee of Congress yesterday to decide the matter as soon as possible, as their principals in Europe would like an answer as soon as possible.

An unfortunate Italian peon, who won 4,000 Nats. in a recent Lottery, is now in the mad-house. He went cracked with joy. His mania was that his wife wanted a carriage and fine dresses to go to the club balls, and he often spoke of renting the Colon Theatre and bringing out Patti to sing for him.

z e 221 m3o j30

Dysentery, Cholera Fever, Ague Coughs, Colds, &c.

Dr J. Collis Browne's Chlorodyne

(Ex Army Medical Staff)

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION—Vice-Chancellor Sir W. P. Wood stated that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's—*See Times*, July 12th 1864.

The Public, therefore, are cautioned against using any other than

Dr J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates health action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensive.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma.

CHLORODYNE effectually checks and arrests too often fatal diseases Diphtheria Fever, Crup. Ague.

CHLORODYNE acts like a charming Diarrhoea, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer Toothache, Meningites, &c.

From Symes & Co., Pharmaceutical Chemist, Medical Hall, Simla, Jan-5th 1880. To J. T. Davenport, Esq., 22, Great Russell Street, Bloomsbury, London—"Dear Sir, we embrace this opportunity of congralulating you upon the wide-spread reputation this justly-esteemed medicine, DR COLLIS BROWNE'S CHLORODYNE has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of DR. COLLIS BROWNE'S CHLORODYNE in Diarrhoea, and Dysentery, Spasms, Cramps, Neuralgia, the Vomitting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleratic Diarrhoea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a "deliberate breach of faith on the part of the chemist to prescriber and patient alike." We are, Sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists."

Extract from the General Board of Health, London, as to its efficacy in Cholera—"So strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all classes."

CAUTION—None genuine without the words 'Dr J. Collis Browne or the Government Stamp. Overwhelming medical testimony accompanies each bottle.

Sole Manufacturer
